Upgrade of existing RifeMedic's to the RifeMedic 235C Professional

Advanced Quantum Radionics Resonator

What is included and what is optional: Included: Optional:

Eight Important Notes:

1: It is important that persons must be basic computer literate in order to download new program and data files from the internet and be able to execute basic procedures to upgrade their own RifeMedic system according to our provided step-by-step procedure.

2: Not all of the Included or Optional modalities and measurement options may be available at the time of your RifeMedic upgrade. New upgrades will therefore be published to the best of our ability on the internet from time to time and users will be notified of such upgrades in order to download and install them.

3: All aspects of spontaneous healing and any other healing accomplished is by the action of our Heavenly Father who is the Only Living God, and by His love and grace this instrument works in the Name of Jesus Christ. If you do not like to see this aspect appear on your system, you have the option to mute it in your system setup.

4: The RifeMedic has received all the necessary 'Certificates of Compliance' from SA authorities. The same original design, quality and quality control processes are maintained in this upgrade.

5: For future RifeMedic sales, both the existing model as well as the new model will be available as two versions of the same device.

6: Optional modality functions will be implemented as free user upgrades. Optional hardware associated with each modality, must be purchased seperately.

7: Quality improvements are made as part of the upgrade.

8: A new advanced RifeMedic optional course of "how to's" will be entertained from time to time. This is important for all users.
